

CLAIMS

WE CLAIM:

1. A clamp for holding a lamp within a reflector housing comprising: a body having at least one semi-cylindrical recess with at least one opening for accepting a cylindrical lamp.
2. The clamp of claim 1 wherein the semi-cylindrical recess is sized to be in close proximity to the circumference of the lamp.
3. The clamp of claim 1 wherein the body has an exterior and the exterior is sized to be in close proximity to the interior of a reflector.
4. The clamp of claim 1 having at least two semi-cylindrical recesses.
5. The clamp of claim 1 wherein the body is formed of a resilient, elastomeric material.
6. The clamp of claim 5 wherein the resilient, elastomeric material is selected from silicone, polyester, polyurethane, polyethylene, neoprene, and butyl rubber.
7. The clamp of claim 1 wherein a cylindrical lamp is pressed into the opening of the semi-cylindrical recess forming an assembly.
8. The clamp of claim 7 wherein the assembly is pressed into a U-shaped opening of a reflector housing.
9. The clamp of claim 1 press-fitted into a U-shaped opening of a reflector housing.
10. A device comprising, at least one clamp of claim 1, at least one lamp and a reflector housing.
